

NOTE:
SOME OLDER MODEL MIDMARK TABLES HAVE A SOLID PLATE BRACE INSIDE THE INNER REAR PANEL, INSTEAD OF THE MORE COMMON "H" BRACE. THIS CUT-OUT TEMPLATE IS TO BE USED AS A GUIDE TO CUT THE SOLID PANEL, PROVIDING AN OPENING FOR THE BASE ACTUATOR MOTOR. IF PREFERRED, A NEW "H" BRACE CAN BE PURCHASED FROM ELECTRAFIT.

"H" BRACE CUT-OUT TEMPLATE

1. TAPE TEMPLATE TO "H" BRACE ALIGNING THE BOTTOM EDGE AND SIDES.
2. CENTER TAP AND DRILL (4) 3/8" DIAMETER HOLES AS SHOWN ON THE TEMPLATE.
3. USING A JIG SAW WITH METAL CUTTING BLADE, CUT PANEL FOLLOWING THE TEMPLATE GUIDELINE.
